

NIKHIL PATKAL

Software Engineer.

Email: nikhilpatkal9552@gmail.com

Mobile: +919322908183

OBJECTIVE

Enthusiastic and driven software engineer with a deep passion for web development, algorithms, and problem-solving. Through various short-term projects, I have honed my programming skills, developing versatility across multiple technologies and coding languages. As a quick learner, I adapt easily to new challenges. I seek to leverage my proficiency in coding languages for a full-time career as a Full-Stack Developer.

EDUCATION

Bachelor of Science in Computer Science (CGPA: 8.04)

Savitribai Phule Pune University | 2020 – 2023

Master in Computer Science (Current CGPA: 8.18)

Abasaheb Garware College | Pursuing

TECHNICAL SKILLS

- **Languages:** Java, Python, HTML, CSS, JavaScript, TypeScript, C#
- **Frameworks:** Bootstrap, Angular, .NET Core Web API
- **Databases:** MySQL, MSSQL
- **Tools:** Git, GitHub, VS Code, Android Studio
- **Soft Skills:** Time Management, Teamwork, Quick Learner

EXPERIENCE

• Software Developer Intern – Trainee

Unlock Future Pvt. Ltd. Pune

May 2024 – Present

Working with a team to develop end-to-end solutions

- Developed web applications using Angular for front-end and .NET Core for back-end services.
- Implemented responsive HTML designs and integrated them within Angular components.
- Managed MSSQL database, including designing and optimizing stored procedures.
- Collaborated on API development using C# for backend logic and database interactions.
- Created and optimized APIs in .NET Core Web API, ensuring robust business logic and seamless database interactions using C#

PROJECTS

1. Donation App

- Developed a **mobile donation app** that connects donors with verified NGOs, **simplifying the donation process**.
- Implemented user authentication, profiles, and transparent donation **tracking with real-time data** management using Firebase.
- Technology Used: **Android Studio, Java, Firebase Real-time Database**.

2. Krushi Sanchar Web Application

- Developed a web application using **Angular** for the frontend and **.NET Core Web API** for the backend.
- Used **MySQL** to manage and store application data efficiently.
- Enabled seamless interaction between farmers and Krushi Seva retailers through product advertisements.
- Implemented **role-based authentication** and secure **JWT-based login** for Farmers, Retailers, and Admins.
- Added an **admin approval system** to moderate advertisements before making.
